DETAILED ACTION***Allowable Subject Matter***

Claims 1-20, and 22-26 are allowed in view of the Applicant's arguments (Response filed 10/23/2006) and the cited prior art of record. The independent claims recite a storage management device that includes control modules on a first set of ports and storage control modules on a second set of ports, and a switch fabric configured to selectively exchange data between the first and second set of ports, in order to transfer data between computers and storage devices, both external to the storage management device, the storage management device also including a first code component configured to operate the control modules to issue a request for device information, a second code component configured to operate one of the storage control modules to receive the request and in response, to obtain the device information corresponding to one or more storage devices, said device information being stored in said one of more data stores, and a third code component configured to operate one of said control modules to receive the device information and in response thereto to initialize, characterize, and profile said corresponding storage devices (initializing, characterizing, and profiling explained in the specification at ¶¶37-38, 44-46), which, in addition to the rest of the claim limitations, are distinguished from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
